Personal Summary

I'm Jose Maria, a Portuguese 3rd year Artificial Intelligent at VU Amsterdam, with foundations in machine learning, statistics and data analysis, with experience as a teaching and research assistant, and interested in applied AI and data analysis. I'm highly motivated to experience new challenges and collecting more hands-on experience while facing a new environment.

EDUCATION

Artificial Intelligence – Bachelor of Science | Vrije Universiteit Amsterdam | 2023 – 2026 | GPA: 7.7

Business Analytics and Data Science – Minor | Vrije Universiteit Amsterdam | 09/2025 – 01/2026

Certificates:

- Introduction to Front-End Development | Meta (Jan 2025)
- Exploratory Data Analysis for Machine Learning | IBM (Feb 2025)
- KNIME Analytics Platform | KNIME (Feb 2026)
- Java Programming | IBM (Feb 2026)
- Docker Fundamentals | Packt (Mar 2026)
- Azure Cloud Services | Microsoft (Feb 2026)

High School Diploma – Escola Básica e Secundaria Artur Gonçalves | Torres Novas | 2020 – 2023

- Presidente Associação de Estudantes e Finalista do Parlamento de Jovens 2022

EXPERIENCE

Logizmic – Data Analysis Intern | 02/2026 – Now

- Gained experience in indirect tax by contributing to ERP and EL system projects and configurations, and supporting the development of a tax reconciliation tool.

Vrije Universiteit Amsterdam – Teaching Assistant | 09/2024 – 12/2025

- Courses: Introduction to Python Programming, Human-Computer Interaction, Applied Programming
- Leading practical sessions, grading assignments and exams and help adapt the course for future years.
- Supported students in debugging thinking and code quality improvement

Vrije Universiteit Amsterdam – Research Assistant | 01/2025 – 12/2025

- Collaborated with Dr. Mauricio Verano Merino on a research project that analysed large-scale educational data to evaluate the effects of Generative AI tools on student outcomes in programming courses. Contributed to a research paper accepted for publication at ICSE 2026.

Albert Heijn – Vulploegmedewerker | 02/2024 – 10/2025

- Maintain the store's image and cleanliness. Coordinate cargo arrivals and transport items to the store. Restock store products. Monitor and manage product expiration dates. Helping customers.

Personal Projects:

Stock Management

Personal project to simulate daily sales, manage inventory, and optimize orders in a supermarket setting. With a simple order policy, key performance indicators (service level, stockouts, costs), and later demand forecasting with the possibility to display on an Streamlit app.
